AND CONSULTING
FOR REFRIGERATION**

DIECI ELECTRIC. THE ALLY OF THE COLD.

diecielectric.it

The company specializes in the construction of electrical panels for the management and control of industrial refrigeration and air conditioning systems.

Established in 2008 from a previous cooperative company, it has two production sites, one in the province of Catania and the other in Brescia, and a large customer base consisting mainly of builders, installers and retailers.

RESEARCH AND DEVELOPMENT AT THE SERVICE OF PROGRESS.

Dieci Electric products and services are highly performing and constantly adapt to new technologies. This is possible thanks to the continuous analysis and research carried out within the company, a state-of-the-art reality, leader in its sector.

Attention to the selection of components and the adoption of targeted measures to ensure the correct operation and start-up of each machine or system, are some of the aspects that allow Dieci Electric to make a difference in every phase of the work.

01

FROM DESIGN TO TESTING BY THE CLIENT'S SIDE.

02

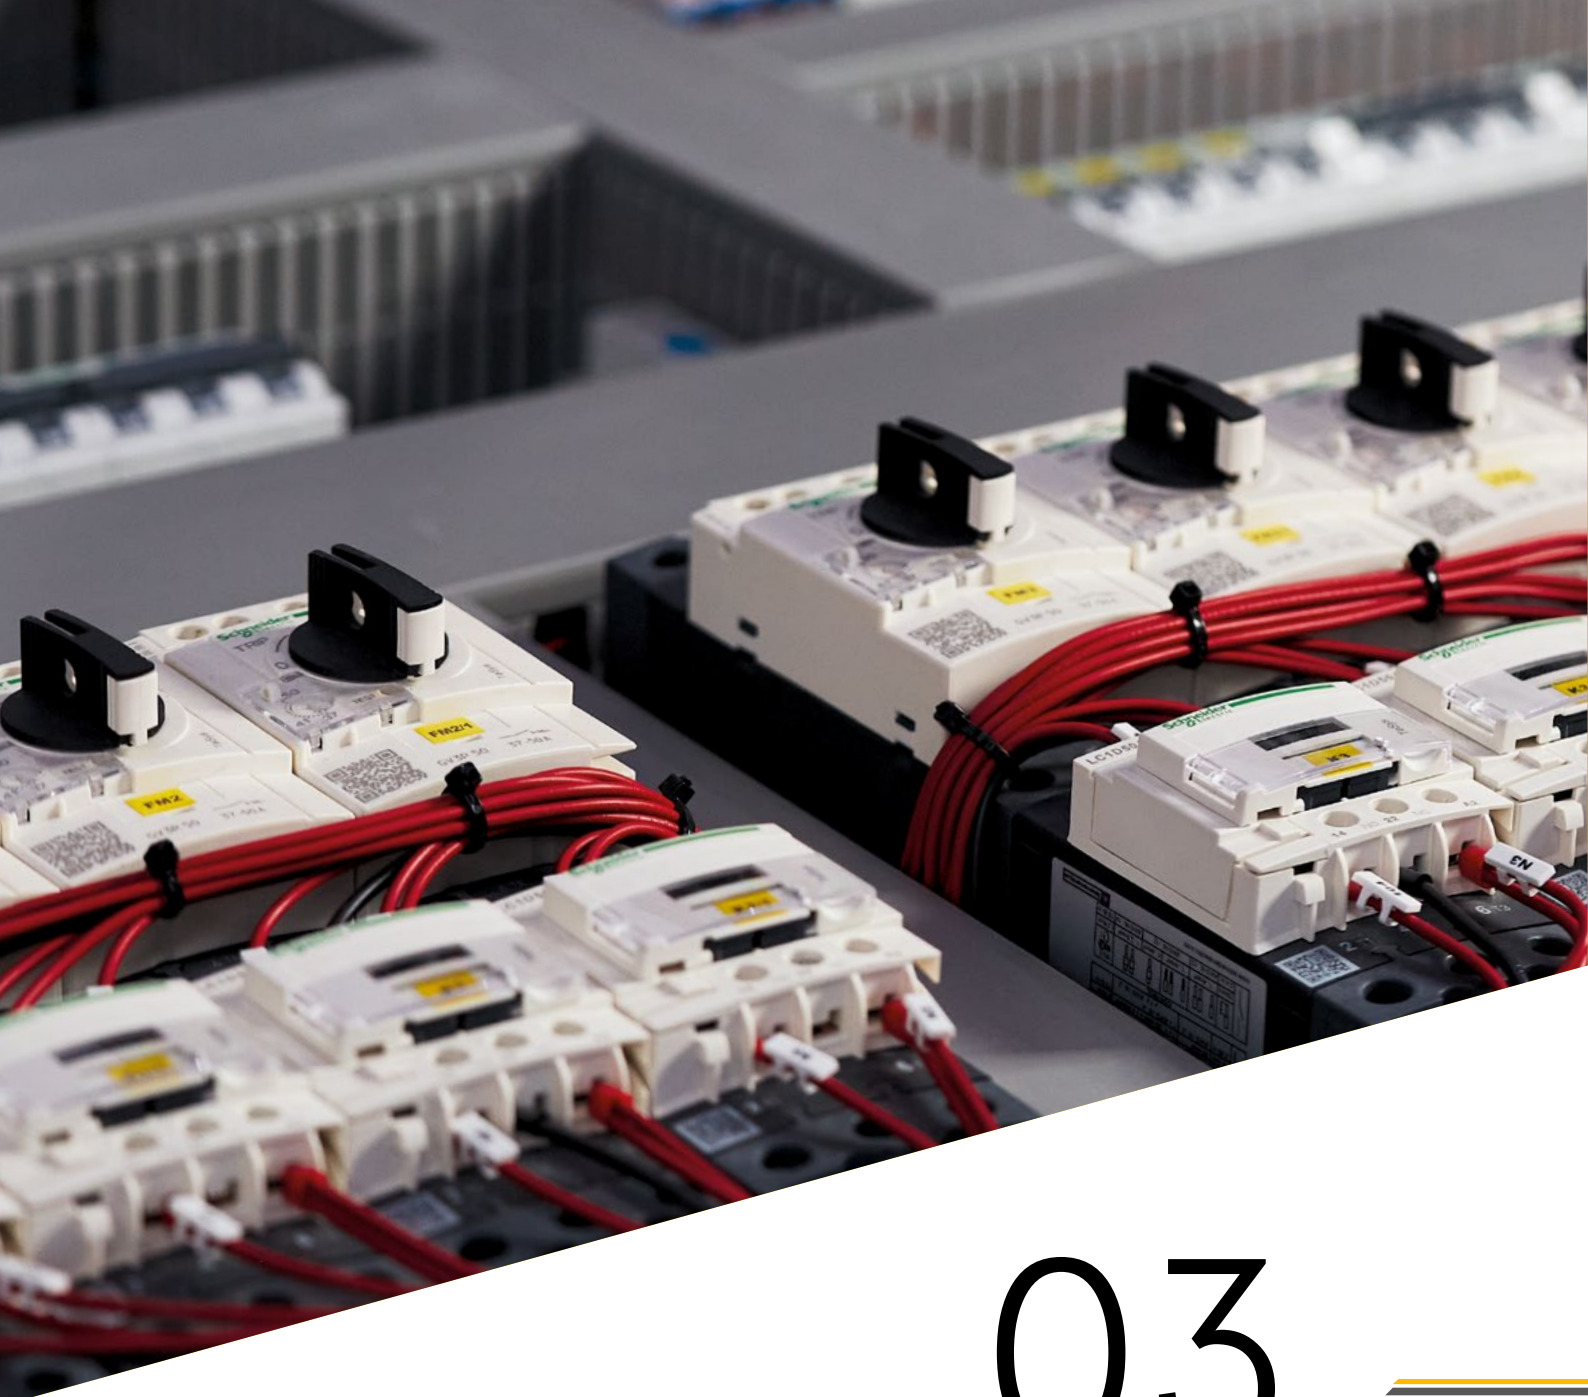

Dieci Electric offers its customers a complete service. Starting from the analysis of their needs, it identifies the electrical panels that are most suited to the management and control of the reference systems, paying particular attention to the characteristics of use.

To guarantee the effectiveness of the product, before delivery, Dieci Electric experts carry out a test that simulates the operation of the switchboard in relation to its application.

Personalized electrical panels for highly performing results.

SAFETY AND PRACTICALITY.

The electrical panels proposed by Dieci Electric are technically advanced and safe. Depending on the type of system, it is possible to equip them with software for remote control and management.

It will thus be possible to remotely check the efficiency of the system through a functional and intuitive interface.

03

CHOOSE TO BE NOTICED, CUSTOMIZE YOUR DEVICES.

04

Each electrical panel installed by Dieci Electric, whether standard or non-standard, can be customized with the brand of the client company thanks to a high-definition printing service of the front masks. This opportunity is particularly useful in order to increase the visibility of your brand in a simple and strategic way.

A SOLUTION FOR EVERY NEED.

Dieci Electric has a complete range of standard devices, able to satisfy almost every need. Should particular needs arise, such as to require the construction of special panels, Dieci Electric intervenes with a targeted customization of the product aimed at obtaining the expected performance.

05

EVERY CHALLENGE IS A STIMULUS TO GIVE YOURSELF.

Dieci Electric sees each order as a challenge, especially when it has to deal with foreign realities that are in many ways different from the Italian ones. The confrontation with ever new situations represents a strong stimulus to put oneself to the test and to commit to guaranteeing the quality that has distinguished the company for years.

06

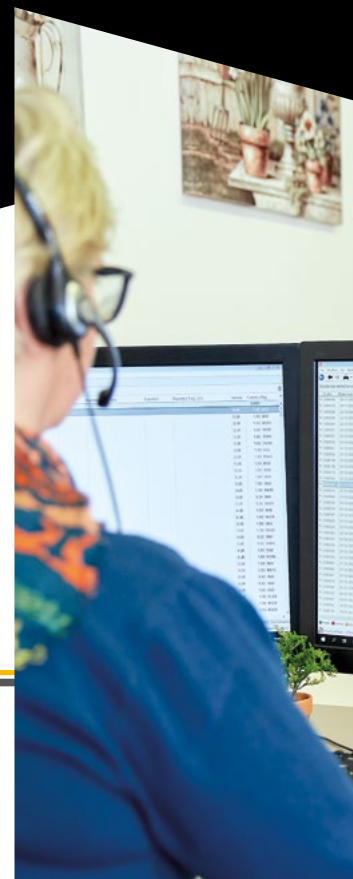

CONTINUOUS ASSISTANCE AND READY INTERVENTION.

Choosing Dieci Electric means having a partner you can always count on. Thanks to the after-sales assistance and the emergency service, customers who rely on Dieci Electric have the certainty of never incurring unpleasant surprises.

On request, a support service is also available for the personnel responsible for managing the system by the specialized technicians of Dieci Electric.
